A good foundation of conditions in buildings-is an old but recently principles has been laid, mostly through the exÂ-rediscovered technique.

Earth sheltering - Wikipedia Earth sheltering is the architectural practice of using earth against building walls for external thermal mass, to reduce heat loss, and to easily maintain a steady indoor air temperature. Earth sheltering has become relatively more popular in modern times, especially among environmentalists and advocates of passive solar and sustainable architecture. However, the practice has been around for nearly as long as humans have been constructing their own shelters. Earth Sheltered Housing : Principles in Practice (eBook ...
